

Report Date: 2025-03-19
Supplier: Orion Ingredients
Items: StarRoot Powder (SR900), CometLeaf Fibre (CL210), SolarBloom Resin (SB777)

Executive Summary

This report evaluates three items from Orion Ingredients. StarRoot Powder shows an adequate planning buffer, while CometLeaf Fibre requires attention due to a shorter replenishment cycle. SolarBloom Resin, although available, has a history of inconsistent supply volumes that warrants additional caution.

Supplier history indicates recurring fluctuations in batch availability during the previous year. No direct quality concerns were recorded, but several shipments were partially fulfilled due to supply constraints.

Item Overview Table

ItemCode	ItemName	CurrentStock	WksToOOS	RiskLevel	SuggestedQty
SR900	StarRoot Powder	300	45	Medium	60
CL210	CometLeaf Fibre	140	22	High	96
SB777	SolarBloom Resin	180	28	Medium	72

Key Concerns

- Supplier has a record of inconsistent batch fulfilment.
 - CometLeaf Fibre requires special scheduling attention.
 - SolarBloom Resin may require buffer planning due to past volume variability.
-

Recommended Actions

- Confirm batch availability forecasts for all three items before initiating PO.
- Build flexible ordering windows to accommodate fluctuations.
- Maintain close communication regarding supply constraints.
- Review alternative stock-building strategies if batch variability persists.

Recommended Deadlines

ItemCode	ItemName	Latest PO Date	Latest Delivery Date
SR900	StarRoot Powder	2025-06-01	2025-08-22
CL210	CometLeaf Fibre	2025-04-03	2025-06-15
SB777	SolarBloom Resin	2025-04-28	2025-07-12

Past batch-level fulfilment issues suggest confirming quantities early.
